

**Axis Software Pte Ltd** is a Singapore based company incorporated to provide quality software development and Systems Integration, solutions to organizations of various sizes.

Axis technical team has a wide range of experience from developing client-server applications to web-based software solutions for enterprise-wide applications. We combine the latest development tools with an ever changing technology, to provide a quality software service that meets the demand of industry trends.

Axis Engineers are based in Singapore so that support can be provided locally with just a phone call away and for our overseas client we are able to provide online support. The team also keeps itself updated with the latest technology in application software development.

Axis clients can attest to the capability of our team's knack to constantly satisfy their ever-changing demands in the competitive business environment of today.

**Our Mission** is "To Enable Organizations-Small, Medium & Large to face the Challenges of Today, by Improving Productivity, Increasing Efficiency, thus further enhancing their Customer Service Delivery, by exploiting the Technologies of Tomorrow"

We specialize in the following areas of services and skills expertise:

- ❖ **Systems Integration.**
- ❖ **Solution Architect**
- ❖ **Software Development Services.**
- ❖ **Microsoft Windows / SQL Server / Visual Basic.NET / ASP.NET**
- ❖ **Internet Applications.**

Our Domain Knowledge in the following areas has benefited many of our clients:

- ❖ **Retail Enterprises.**
- ❖ **Remittance and Forex Businesses.**
- ❖ **Hotels & F&B Sector.**
- ❖ **Automobile Workshop**

In addition to the above, we have developed custom software that is tailored to the specific needs of our clients with interfaces to their back-end Legacy systems.

Some of our Outstanding Software Products are ...

**RetailSuite** Retail Management Information Software for any type of retail Business.

**AxRemiTT** A Remittance Management Software is the Ultimate Solutions for your Remittance Enterprise.

**AxMoney** A Money Exchange Software builds to Suite the exact requirement of Money Changers.

**AxDineInn** A Restaurant Point of Sales Software can help any type of restaurant to run more efficiently.

**Budget Inn** A Comprehensive Hotel Management Software for Small and Medium size Hotels.

**AxRemiTT** is an established and mature Remittance software package. It has already been successfully used by global remittance businesses, handling hundreds of agents worldwide. This Remittance Management Software comes with optional integration of our Money Exchange Software and Accounts Module, is the ultimate Remittance Management Solution for your Remittance Enterprise.

### **Branch and agent management**

Any number of branches, Agents and Banks can be created and Maintained for the Remittance Transaction network.

### **Customers (Applicant & Beneficiary) management**

New customers can be created quickly and easily. Similarly, existing customers can be searched and managed using various search criteria.

### **Anti-money laundering compliance**

AxRemiTT complies with many national anti-money laundering legislations. For example, unique customer IDs can be created and scanned images of documents can be stored in the system. Names can be checked against blacklists. New Blacklisted details can be entered.

### **Reliable and secure**

This AxRemiTT Remittance Software uses role-based logins for robust security and data protection. Users are assigned roles with an appropriate username and password. The level of access, and the tasks they can perform, depends on the role they have been assigned. For even greater security, each user role has different levels of ability. For example, Super Admins can perform any administrative function where as tellers can enter data but can't make changes like deleting transactions.

### **Multiple Branch Management**

This AxRemiTT Remittance Software Supports Multiple Branches (via Internet) with the Centralized Data.

### **Accounting - We Care**

Whether you are a small currency exchange outlet or you run a wholesale operation and manage forward contracts, you need a system which can track your accounts, positions, inventory and other accounts in a centralized Database.

If you have been operating a foreign exchange business, you know that accounting is a very challenging and time consuming task. Most accounting packages on the market are not tailored to address the needs of foreign exchange businesses. AxMoney automatically takes care of the double-entry journal registry in the background.
